

[Click here to see CSA Certification Ratings](#)

This label certifies that our products meet the operational and optional thermal performance required by the CSA and are subject to independent inspection to verify manufacturer's claims of performance and energy efficiency.

Many of our products are Canadian Standards Association and National Fenestration Ratings Council Certified. When a company tests a window, they often send a specially made unit to achieve the best result. This means that the windows they sell are very unlikely to live up to the performance claims they publish. A certified window means that testing is performed on a production window that is chosen at random by an independent tester. You are assured that the test results are an accurate reflection of the window you purchase and the materials used are the same as those in the test window!

WindowWise™ is a unique program developed by the Siding and Window Dealers Association of Canada. It is a unique program that includes a certified installer who has voluntarily taken extra training for installing high performance products.
