MAKE YOUR MARK WITH OUR DECORATIVE WINDOWS

Steel-Craft’s snap-in window design offers easy access for window cleaning and allows you to change your design without replacing your glass. Each frame and insert is manufactured with UV resistant material to help prevent fading. We also offer a series of decorative design windows in sealed glass units with inlaid muntin bars. For even more window options, visit steel-craft.ca.

- Frames and decorative inserts are injection-molded using pre-colored polypropylene which ensures a precise color match between frame and insert.
- Snap-In decorative inserts allow for easy removal, cleaning and replacement.
- Clean, smooth, subtle, unique woodgrain texture.
- UV resistant – will not fade, discolour or warp.
- To ensure there is a proper seal between the window frame and door panel, we caulk all windows to safeguard from moisture penetrating the inside of the frame or door.

Warranty: Window frames and decorative inserts for five (5) years from the time of installation against cracking or major discoloration. Sealed glass windows for one (1) year from the time of installation against the formation of condensation within the sealed unit.
