

SOLAR SHIELD SOFT COAT FOR SOLAR CONTROL

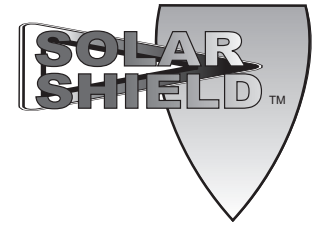

RADIANT HEAT
POTENTIAL SOLAR HEAT GAIN

LIMIT SOLAR HEAT GAIN
AND IMPROVE RADIANT HEAT
REFLECTION TO ENJOY A
COOLER SUMMER
ENVIRONMENT.

Windows for Life!
**WWD Vinyl Window
Designs Ltd.™**

**SOLAR SHIELD SOFTCOAT OFFERS
EXCELLENT INSULATION VALUES COMBINED
WITH STRONG *RESISTANCE TO SOLAR HEAT GAIN!***

- 1. The best glass for a high 'U' value, clarity and low solar heat gain where summer solar control is critical!**
- 2. Low .46 Solar Heat Gain Coefficient minimizes solar heat to increase indoor comfort during summer.**
- 3. High 3.2 R value in an air filled sealed unit.**
- 4. Higher 3.9 R value in an Argon gas filled sealed unit.
(Ask about our superglass options!)**
- 5. Unusually clear .71 Visible Transmission for a glass with solar control properties.**
- 6. Helps minimize summer energy usage.**
